Exceptional designs

Versatility and a smooth user experience is the hallmark of Starx Lifts design. Our wide range of elevator designs are created to enhance diverse building construction designs while evoking a sense of contemporary elegance. We continue to innovate in our designs and to surpass the expectations of our customers and users.

High Speed & Large Capacity Elevators

Starx Lifts developed newest technology for customers unable to provide lift pit and also have introduces solutions to existing buildings with same issue with a speed as conventional elevators.

Machine Room-Less Elevators

Starx Lifts constantly seeks to innovate and develop the most space-efficient design for our elevators. Our machine room-less elevators offers customers greater design freedom, and maximizes rentable space for the building.

Home Elevators

Starx Lifts provides elevator solutions for small space within private houses with same trusted quality and performance.

STARX LIFTS SAFETY FEATURES:

INFRARED LIGHT CURTAIN

S-crossing light beams detect the smallest obstruction in door path and stop doors from closing
Full height infra red curtain with multiple

OVER LOAD SENSOR WITH AUDIO VISUAL INDICATION

On overloading of the lift, car audio-visual indication is provided and doors are kept open till excess load is removed.

SLOT LESS DOOR SILLS

Stainless steel lift car is now complimented by matching stainless steel bottom sills. More ever bottom sills are groove less, thus enhancing esthetic appearance of the elevator. No slots for dust to accumulate and obstruct the door. So trouble free operation is ensured.

CAR EMERGENCY LIGHT & FAN

The emergency light is always illuminated in normal condition and switches itself automatically to battery backup in case of power failure fan also operates for minimum 20 minutes after power failure.

EMERGENCY ALARM & PUSH TO TALK

In case of any emergency of power failure, help can be obtained by alarming by communicating at lobby through this system which is battery and self charging

EMERGENCY RESCUE BUTTON

In the event of power failure, trapped person in lift car rescue themselves by pressing emergency rescue button provided in car panel

SAFETY IN CASE OF OVER TRAVEL

When phase electric power is disconnected from control panel and motor, the moment elevator car moves beyond the limit of top and bottom terminal floors causing immediate application of the brake to bring the elevator to halt.

SAFETY IN CASE OF ROPE BREAKING

In the elevator of breakage of ropes, elevator speed exceeds the rated speed in the downward direction due to gravitational acceleration. The over speed governor activates the clutch mechanism thereby switching off main controls and jamming the elevator car safety on guide rails

PU BUFFERS

Polyurethane polymer block are long lasting, weather resistant and most reliable in all operating Conditions for providing maximum safety in case of guide rails.

CAR FAN AUTOMATIC STOP

Car fan automatically stop when there are no resistant and most reliable in all operating Conditions for providing maximum Safety in case of buffering of elevator car.

VOICE ANNUNCIATOR WITH MUSIC

This system provides detailed information to passengers related to next floor, direction of movement, door opening closing, Scheduled operations and other information depending on the building needs. This system features natural electronic voice synthesizers.

MICROPROCESSOR BASED V3F (VARIABLE VOLTAGE, VARIABLE FREQUENCY), VECTOR CONTROLLED DRIVE WITH ENCODER FEEDBACK CLOSED SYSTEM DOOR OPERATION.

This system reduces the door opening and closing time drastically compared to conventional door operation system thereby improving The passenger handling capacity and reducing the waiting time at landing.
